DISCLAIMER

Forex is a highly speculative and extremely risky market. Even though profits can be considerable, you should always understand that past performance is not a guarantee of future profits.
necessarily indicative of future results.

This market is very little regulated and the broker partner of autotrade gold 4.0 has no official regulation.

This presentation should not be taken as a solicitation to invest, simply to be taken as information.

DEFINITION AND ADVANTAGES OF TRADING ROBOTS

A trading robot is a program or software that can be used to trade automatically.

ADVANTAGES :

- Can operate 24/7
- Very fast, precise and consistent in the implementation of trading strategies
- Free up time for user
- Can trade automatically without the need for the user to learn and understanding trading

MATERIAL SPECIFICATION

All Autotrade gold 4.0 robots do not require any special equipment.

The software required to monitor transactions is Metatrader4

Metatrader4 can be downloaded in different versions :

DESCRIPTION OF AUTOTRADE GOLD 4.0

It is specially made for the forex market and only trades on one pair: **XAU/USD**

It is designed with sophisticated artificial intelligence that allows it to adapt to market conditions in real time and to fine-tune almost all of its trading operations.

AUTOTRADE GOLD 4.0

HOW IT WORKS

- **The objective is to generate between 0.5 and 1% per day:** this means that until the objective has been reached, the robot will continue to look for opportunities to open new positions provided that they comply with the predetermined logical conditions.
- **The maximum loss is 3% per day**
- **The robot uses a scalping strategy:** opening and closing a position in a short time interval in order to take advantage of small market movements.
- **The robot uses single-entry techniques:** which means that it never opens two operations simultaneously. It therefore does not hedge or martingale. This limits exposure and therefore limits the risk of loss in the event of strong movements.
- **Transactions are carried out at 24-hour intervals,** which means that there is no floating beyond the day or the weekend.
- **Trading hours:** Monday to Friday (The Forex market is closed on weekends)

AUTOTRADE GOLD 4.0

HOW IT WORKS

- **Money Management :** Approximately 10% per trade (example: 1 lot per open position for $10,000 of capital).
- **Automatic compound interest:** As soon as the robot has accumulated about $100 of winnings, the money management will be adjusted automatically. (0.01 extra lot for every $100 of winnings)
- **Capital 100% available,** no return on investment, your profits accumulate to your initial capital and you can make your withdrawals whenever you want. Money management is adjusted according to the funds remaining in your trading account.

It is strictly forbidden for any user of the Autotrade Gold 4.0 trading robot to intervene manually on the work of the robot. In order to avoid any problems, it is advisable to connect to your trading account with your investor password.

AUTOTRADE GOLD 4.0

DEPOSITS / WITHDRAWALS

You can make your deposits and withdrawals in Bitcoin, UsdT (Erc20 network), CoinPayements or bank transfer if you have a bank account in Indonesia (IDR currency).

The withdrawal limit* is set at $2,000 per day.

VIP status from $100,000 capital in the trading account.
The daily withdrawal limit for a VIP member is 10% of the capital held.

*The daily withdrawal limit is put in place so that there is always enough liquidity on the company's exchange (Indodax) to ensure a reasonable withdrawal period for all members (24 hours maximum on weekdays to receive a withdrawal).

If you wish to make a total withdrawal of your trading capital, you must make a request to the head of your team. A special withdrawal request will be sent to release your funds in full as soon as possible. In case of a full withdrawal, the purchased license will be lost.

FEES :

Deposits = $20 on each deposit

Withdrawals = via Bitcoin 2%

via UsdT 25$ per withdrawal (20$ fixed + 5$ Erc20 network fees)

The crypto pick-up address must be entered in the profile beforehand.

*Subject to modifications
