October 2022

## **LEGAL DISCLAIMER**

The information contained herein has been obtained from various internal and external sources believed to be reliable, but no representation or The Company or its affiliates, employees or representatives make no representations or warranties as to the accuracy or completeness of such information. Representatives as to the accuracy or completeness of such information. The Company has not independently verified any of the information set forth in set forth in this Presentation. No representation is made as to the reasonableness of the assumptions contained herein or the accuracy or completeness of completeness of any projections, modeling or any other information contained herein. Any past performance or modeling information contained in this document are not indicative of future performance. The company assumes no obligation to update the information in this Presentation.

## **NO OFFER OR SOLICITATION**

This presentation does not constitute a solicitation of a power of attorney, consent or authorization with respect to any securities. Nor does this presentation constitute an offer to sell or a solicitation of an offer to buy any securities. No offer, sale or solicitation of an offer to buy any securities shall be made in any jurisdiction in which such offer, sale or solicitation would be prohibited.

## **INVESTOR NOTICES**

Investing in our company involves a high degree of risk. Before making an investment decision, you should carefully consider the risks and uncertainties. If any of these risks occur, our business, financial condition or results of operations could be adversely affected.

In this case, you could lose part or all of your investment. The risks and uncertainties we have described are not the only ones we face. Additional risks not currently known to us, or that we believe are immaterial, could also adversely affect our business. In addition, our past financial performance cannot be a reliable indicator of future results, and historical trends should not be used to predict future results.

## **FINANCIAL MEASURES**

The Company uses a variety of financial measures, both GAAP and non-GAAP, to analyze and evaluate its overall performance, to make operating decisions and to anticipate and plan for future periods. The Company believes the use of non-GAAP financial measures is useful in evaluating current financial performance, current operations and future prospects. Although the Company uses non-GAAP financial measures as a tool to improve its understanding of certain aspects of its financial performance, the Company does not believe that these measures replace or exceed the information provided by GAAP financial measures. Consistent with this approach, the Company believes that the disclosure of non-GAAP financial measures to readers of its financial information provides such readers with useful additional data that, while not a substitute for GAAP financial measures, enhances transparency in analyzing its financial and operating performance. Investors are cautioned that there are limitations to using non-GAAP financial measures as an analytical tool. In particular, non-GAAP financial measures are not based on a complete set of accounting rules or principles, and many adjustments to GAAP financial measures reflect the exclusion of items that are recurring and will be reflected in a company's financial results for the foreseeable future. In addition, other companies, including other companies in the Company's industry, may calculate non-GAAP financial measures differently than the Company, which limits their usefulness as a comparison tool. All amounts in US dollars unless otherwise specified. The financial information included in this document is based on the Amirox Investment Company's IFRS financial statements. Non IFRS financial information included in this document has not been audited or reviewed. This document contains forward-looking statements, including statements regarding future earnings and distributions that are based on information and assumptions available to us as of the date of this document. Actual results, performance or achievements could be significantly different from those expressed in, or implied by, these forward-looking statements. These forward-looking statements are not guarantees or predictions of future performance, and involve known and unknown risks, uncertainties and other factors, many of which are beyond our control, and which may cause actual results to differ materially from those expressed in the statements contained in this document. You should not place undue reliance on these forward-looking statements. Except as required by law or regulation (including the ASX Listing Rules) we undertake no obligation to update these forward looking statements

# A few words about the Founder

In 2021, an experienced and ambitious man, [Mr. Robert Norton](#), an analyst and marketer for the Australian Goodman group, founded his company [Amirox IC](#), and is now its CEO.

The need for his company, he attributed to the fact that in the current situation with COVID-19, his management failed to adequately assess the situation and the performance of his department began to fall, until the entire department was suspended permanently.

Robert was not discouraged, and was well aware that he had excellent leadership skills, solid start-up capital and acquaintances with the best colleagues in their fields. So they followed Robert's lead. Thus, a week later, a team of like-minded people was assembled, outlining the creation of a small investment company.

By the end of 2021, diligent and painstaking work had resulted in contracts with some of Australia's most successful companies, such as Scentre Group, GPT Group, Mawson Infrastructure Group, AvaTrade and others.

# About the Amirox IC

Amirox Investment Company PTY LTD is engaged in investment activities in various business areas of the world and receives its profits from them, and the person who signed the contract is paid dividends. At the moment there are **four** such areas<sup>1</sup>, namely:

- ▶ cryptocurrency mining
- ▶ forex trading
- ▶ real estate
- ▶ artificial intelligence systems

In addition to the company's own capital, Amirox IC also raises capital for investment activities from individuals and legal entities from all over the world. Becoming a partner of the company is easy enough and you can get your first payout in just a few days.<sup>2</sup>

## Cryptocurrency mining

Despite the fact that this direction is more than 12 years old, it will and still is quite popular. Mining is the activity of creating new structures to ensure the functioning of cryptocurrency platforms. The creation of another structural unit is usually remunerated through new cryptocurrency units issued and/or commissions.

As of this date, **Amirox IC** has a partnership agreement with **Mawson Infrastructure Group**, a mining company operating since September 2019. All investments made on behalf of **Amirox IC** in favor of **Mawson Infrastructure Group** are spent on the purchase of new ASIC equipment, maintenance and rehabilitation of already operating equipment, and maintenance of the technical condition of data centers. In return, **Amirox IC** receives certain dividends which it distributes among its contracted clients in this direction.

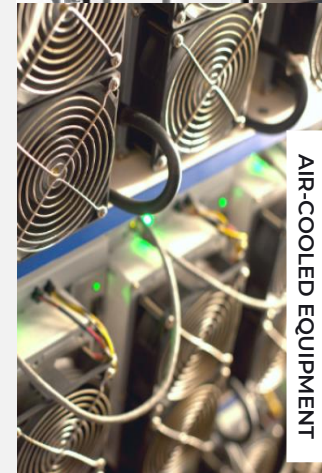

Also, please note that this is the most affordable way to invest, allowing you to check the honesty and due diligence of **Amirox IC**.

# Cryptocurrency mining

Mawson's **advantages** over competitors:

## Luna Squares

Luna Squares, a subsidiary of Mawson Infrastructure Group, strategically positions itself as a leader in energy efficient, purpose built, hosting infrastructure that has been designed exclusively for the operation of blockchain based High Performance Computing.

By establishing its facilities close to key energy sources, including renewables, Luna Squares delivers a scalable platform that meets both current and future sustainability targets.

## Modular Data Center

Luna's Modular Data Center (MDC) design is both scalable and flexible to allow for rapid deployment of new customer facilities, without upfront sunk capital being stranded in unutilized data center real estate. This innovative model allows for significant commercial benefit to the operational cost of a company whilst providing limitless scalability to future customers deployments

## Infrastructure Optimisation

Significant intellectual property (IP) sits within our MDC's, hardware purchases, and site selection processes – including power contracts, site layout and construction, MDC configuration, cooling, sysops, and network management. A key part of Luna's service offering is to ensure optimal facilities for its customers that meet both performance and cost benchmarks, day in, day out.

## Forex trading

As you know, trading in the forex market is accompanied by a very high risk. But if you want to get income from forex trading and at the same time do not want to incur money losses, then we encourage you to pay your attention to this area.

For 2021, **Amirox IC** has a cooperation and investment agreement with the Australian company **AvaTrade**. **AvaTrade** has a whole department of private traders who are internationally certified and have extensive experience under their belt. **Amirox IC** profits from the trust management of its users' money through **AvaTrade**, which is distributed among the contracted users in this area.

**RELIABLE COMPANY**

AvaTrade has been  
operating since 2006.

## Investment area

# Real estate

Real estate has historically been considered one of the oldest and most reliable tools for investing. Therefore, investing in real estate does not surprise anyone. But nevertheless, it has its own advantages:

- Real estate cannot fall in price to zero, but if there is a drop in price, it falls insignificantly.
- Real estate is tangible, clearly visible, unlike other forms of investment.
- Real estate can be sold, and thus get in an emergency cash investment.

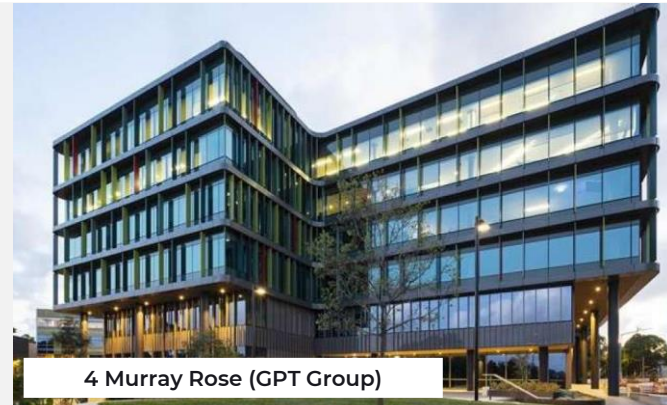

Today, **Amirox IC** has partnership agreements with Australia's largest real estate investment companies, such as **Scentre Group** and **GPT Group**. These companies both invest in promising and high-quality real estate, and directly build residential facilities, shopping centers and other liquid buildings.

**Amirox IC** invests and receives money in the form of dividends from the aforementioned companies and distributes them among its contracted users in this area.

The GPT Group

# Artificial Intelligence

Artificial intelligence is becoming an increasingly ubiquitous part of everyday life, reflecting the way we live and work.

The benefits and prospects of artificial intelligence for society and business are undeniable. It helps people make better predictions and informed decisions, enabling innovation and improving productivity. It helps detect credit card fraud, diagnose diseases and contribute to the global fight against COVID-19.

Many large companies, such as Google, YouTube, Amazon and Apple, are using artificial intelligence systems with great success. Their audiences of millions of users, thanks to artificial intelligence systems, generate a very large income, part of which is paid in royalties to the developers of artificial intelligence.

In 2021, a cooperation and investment agreement was signed with **FIVE2ONE**, and in 2022 with **UPCORE**. All of them provide software development services, including artificial intelligence. The purpose of **Amirox IC** is to finance these companies, and with the proceeds the companies update their workplaces, computers and purchase licensed software. The dividends received from them in the form of royalties from the major companies are sent to **Amirox IC**, which distributes them among its contracted users in this area.

## They talk about us

**Mr. James Manning**  
CEO of the **Mawson**  
Infrastructure Group

”

In 2021, a Robert Norton signed up for a business meeting with me. At the time, I had no idea how this meeting would turn out and what the prospects would be. Normally, we receive requests for individual investments, but Robert presented an outline and ideas for his future platform, which later became known as "Amirox IC". The idea was that instead of contracting individually, Robert would offer to refer investments of interested investors from his platform directly to us, thus acting as an intermediary. After some paperwork, the collaboration between Amirox IC and Mawson Infrastructure Group became possible. Investments from interested parties were sent directly to us from Amirox IC, bypassing tedious meetings with potential investors in our office. As of 2022, the Amirox IC platform is showing impressive results in terms of financial flows directed to us. We predict successful cooperation for many years to come!

**Mr. Bob Johnston**  
CEO of the **GPT Group**

”

What Robert Norton offered was not new to us. However, few have been able to develop their online intermediary investing platforms to such a high level. On the contrary, Amirox IC on the other hand has a solid start-up capital and a team of familiar people with an impeccable reputation with us in Sydney. The first investment through Amirox IC came to us just 3 months after Amirox IC was founded. With the advent of the online platform, anyone can act as an investor and put their money where they want it most and profit from it. My prognosis for Amirox IC is positive. If the company manages to stay in its niche for a year, it will last for decades.

# Amirox IC
