DISCLAIMER ON LIMITATION OF LIABILITY

These internal working materials are exclusively intended for informative purposes.

In particular, the enclosed information should not be considered as a financial, commercial, investment, legal or any other type of proposal or offer. This information should also not be taken as a call-to-action or an urge to utilize the described services. Any decisions on the use of these materials should be made independently.

Minting of Coins

Through a so-called minting (technical process), via delivered hardware or hardware which is maintained and serviced for the user in the course of a so-called “In-house Minting”, users have the opportunity to mint coins. No liability or guarantees can be assumed for the price development of these coins on crypto exchanges, as price developments of cryptocurrencies are dependent on multiple market influences.

Cryptocurrency trading is inevitably linked with certain risks, highly speculative, and may lead to partial or total losses in the prices of cryptocurrencies at your disposal.

We strongly recommend you to make informed decisions on trading, investing or exchanging cryptocurrencies, relying on professional consultations as needed. Make sure to verify the services offered by the companies indicated in these materials before using their products - installing, registering, purchasing, or using these products for trade and investment purposes.

Please note that the information contained in this presentation is subject to change, which means that important aspects of the project can be changed or abandoned at any time.

Time Halving & Sales Halving

With a so-called time halving & sales halving, the total number of minted coins can differ from masternode to masternode (hardware / processor for minting coins). Basically, the later a masternode is activated for the minting process, the lower the total number of minted coins. Therefore, before you consider a possible activation of a masternode, check whether the number of coins still to be minted by this is fair to your decision.

Forecasts

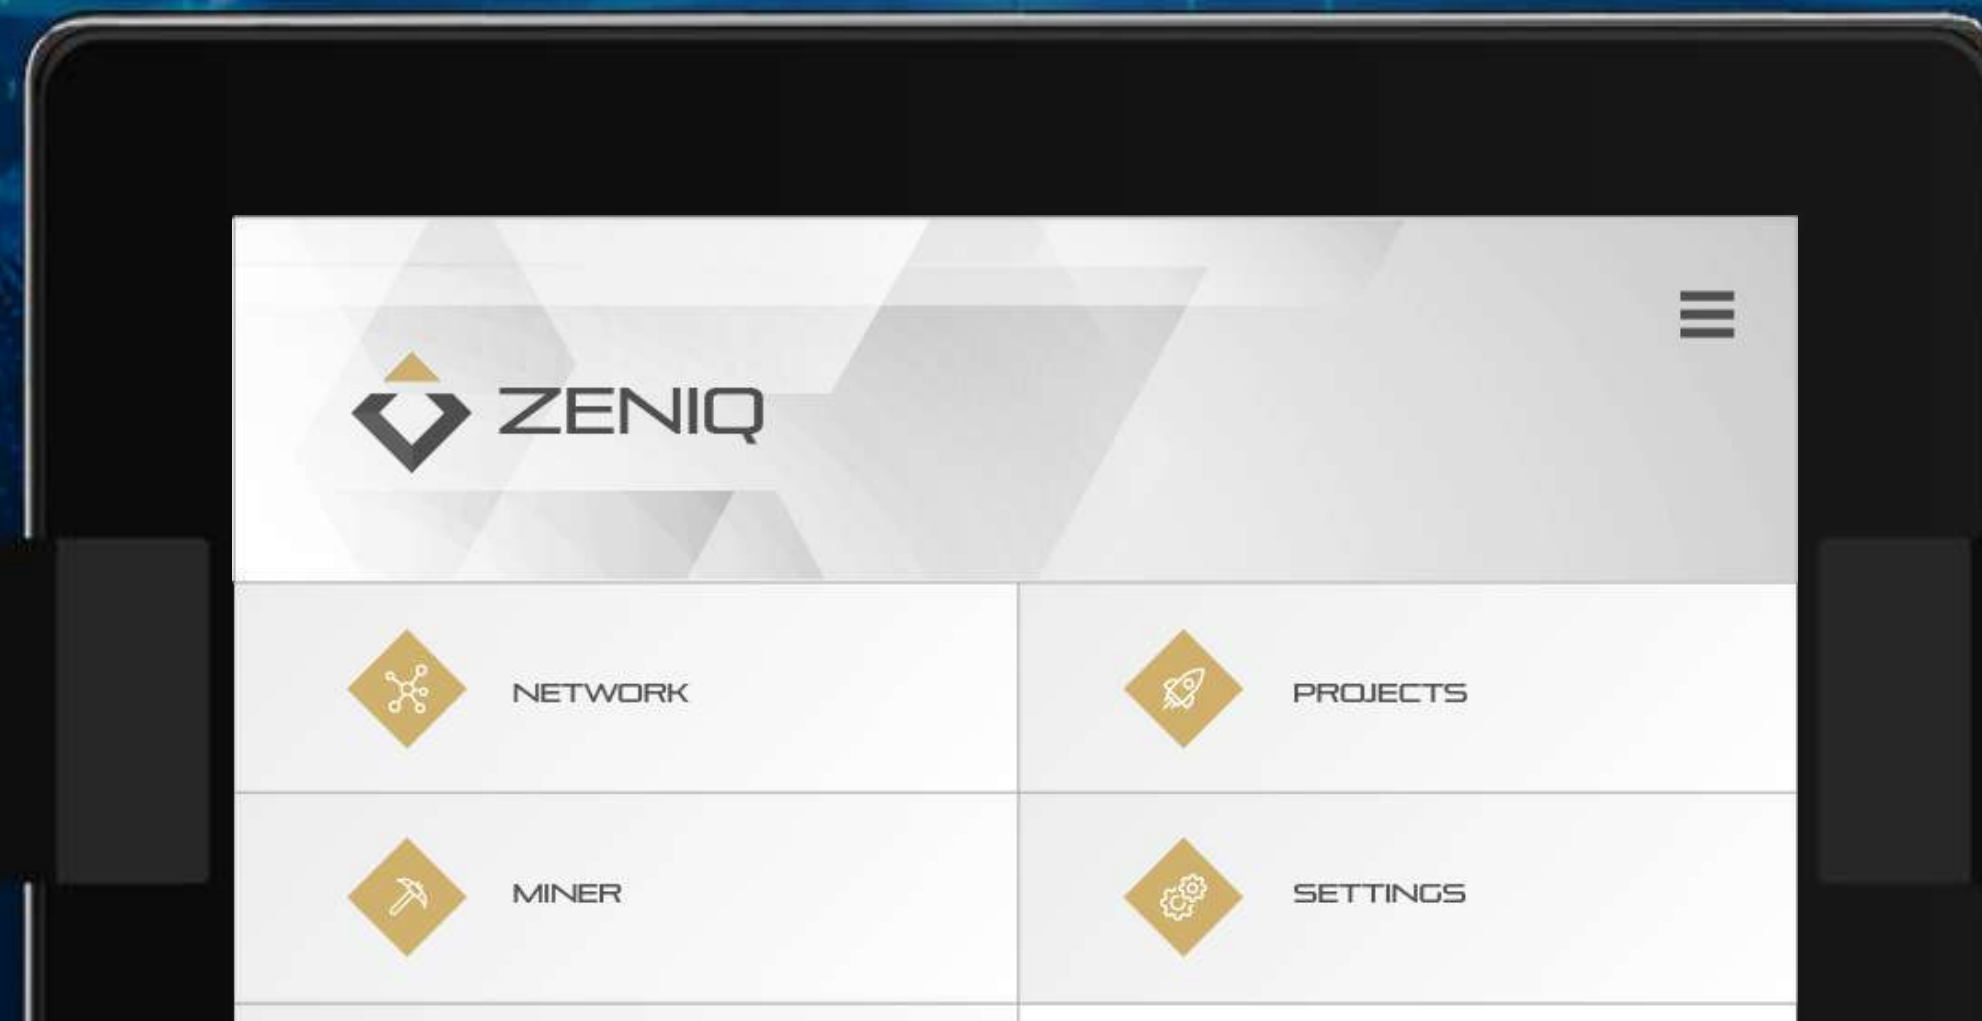

Made forecasts into the future are based on previous developments. These therefore do not represent any promises or guarantees. Changing market conditions or unforeseeable events which are outside of the company's own degree of effectiveness can influence future developments to a small or large extent.

ZENIQ TECHNOLOGIES FINTECH ENTERPRISES

The next generation of crypto and fiat payment
Seamless FIAT & Crypto Ecosystem for Finance and Investments

“Enter the Multi Trillion Dollar Market”

MISSION

“Connecting Traditional Banking and Crypto on one platform where people can build an home based business and create a sustainable income by using the ZENIQ Platform”

Topics that affect **EVERYONE** – consciously or unconsciously!

Questions about the future – ZENIQ answers with solutions!

Overview

- Simple, uncomplicated access to the crypto world – for **EVERYONE**!
- Maximum protection of digital assets
- Legal protection of unauthorized third-party access (owner or holder?)
- Fusion of the crypto world and the existing financial world
- The link between crypto world and trade (online & offline)

Asset accumulation for everybody

- ZENIQ Coins (EXCLUSIVE in-house minting for Safir)
- Decentralized exchange (with minimal fees)
- Trillion market tokenization
- and much more

Example: How “In-house Minting” looks like?

ZENIQ BLOCKCHAIN

Decentralized Exchange on ZENIQ Blockchain

Difference between
centralized and
decentralized

KEY FACTS ZENIQ EXCHANGE

- Up to 50,000 TPS (transactions per second)
- Blockchain operates across the board, such as Ethereum Blockchain, Tron Blockchain, Binance Chain, etc.
- First REAL decentralized exchange of its kind, no more "wrapping" required

What means "across the board"?

ZENIQ has its own Blockchain and it works across the board at ETH Blockchain, Binance Chain, Tron, Matic Blockchain and many more that are popular.

ZENIQ Blockchain: All blockchains and thus coins and Tokens on one platform united. These can be traded decentrally, very easily and quickly.

*Examples of Blockchains operates across the board

YOUR access to FINANCIAL SOVEREIGNTY

KEY FACTS

- Hardware-Wallet
- 7-inch HD touch screen
- 2 GHz with 6 core processors
- 250+ GB memory
- Portal for digital investments
- Direct access to the decentralized ZENIQ Exchange
- No KYC required (holder & owner)

IN ADDITION

- Each ZENIQ HUB is a ZENIQ masternode
- Minting function: daily minting of ZENIQ Coins
- Additional masternodes possible
- ZENIQ coin can be used as platform for tokens

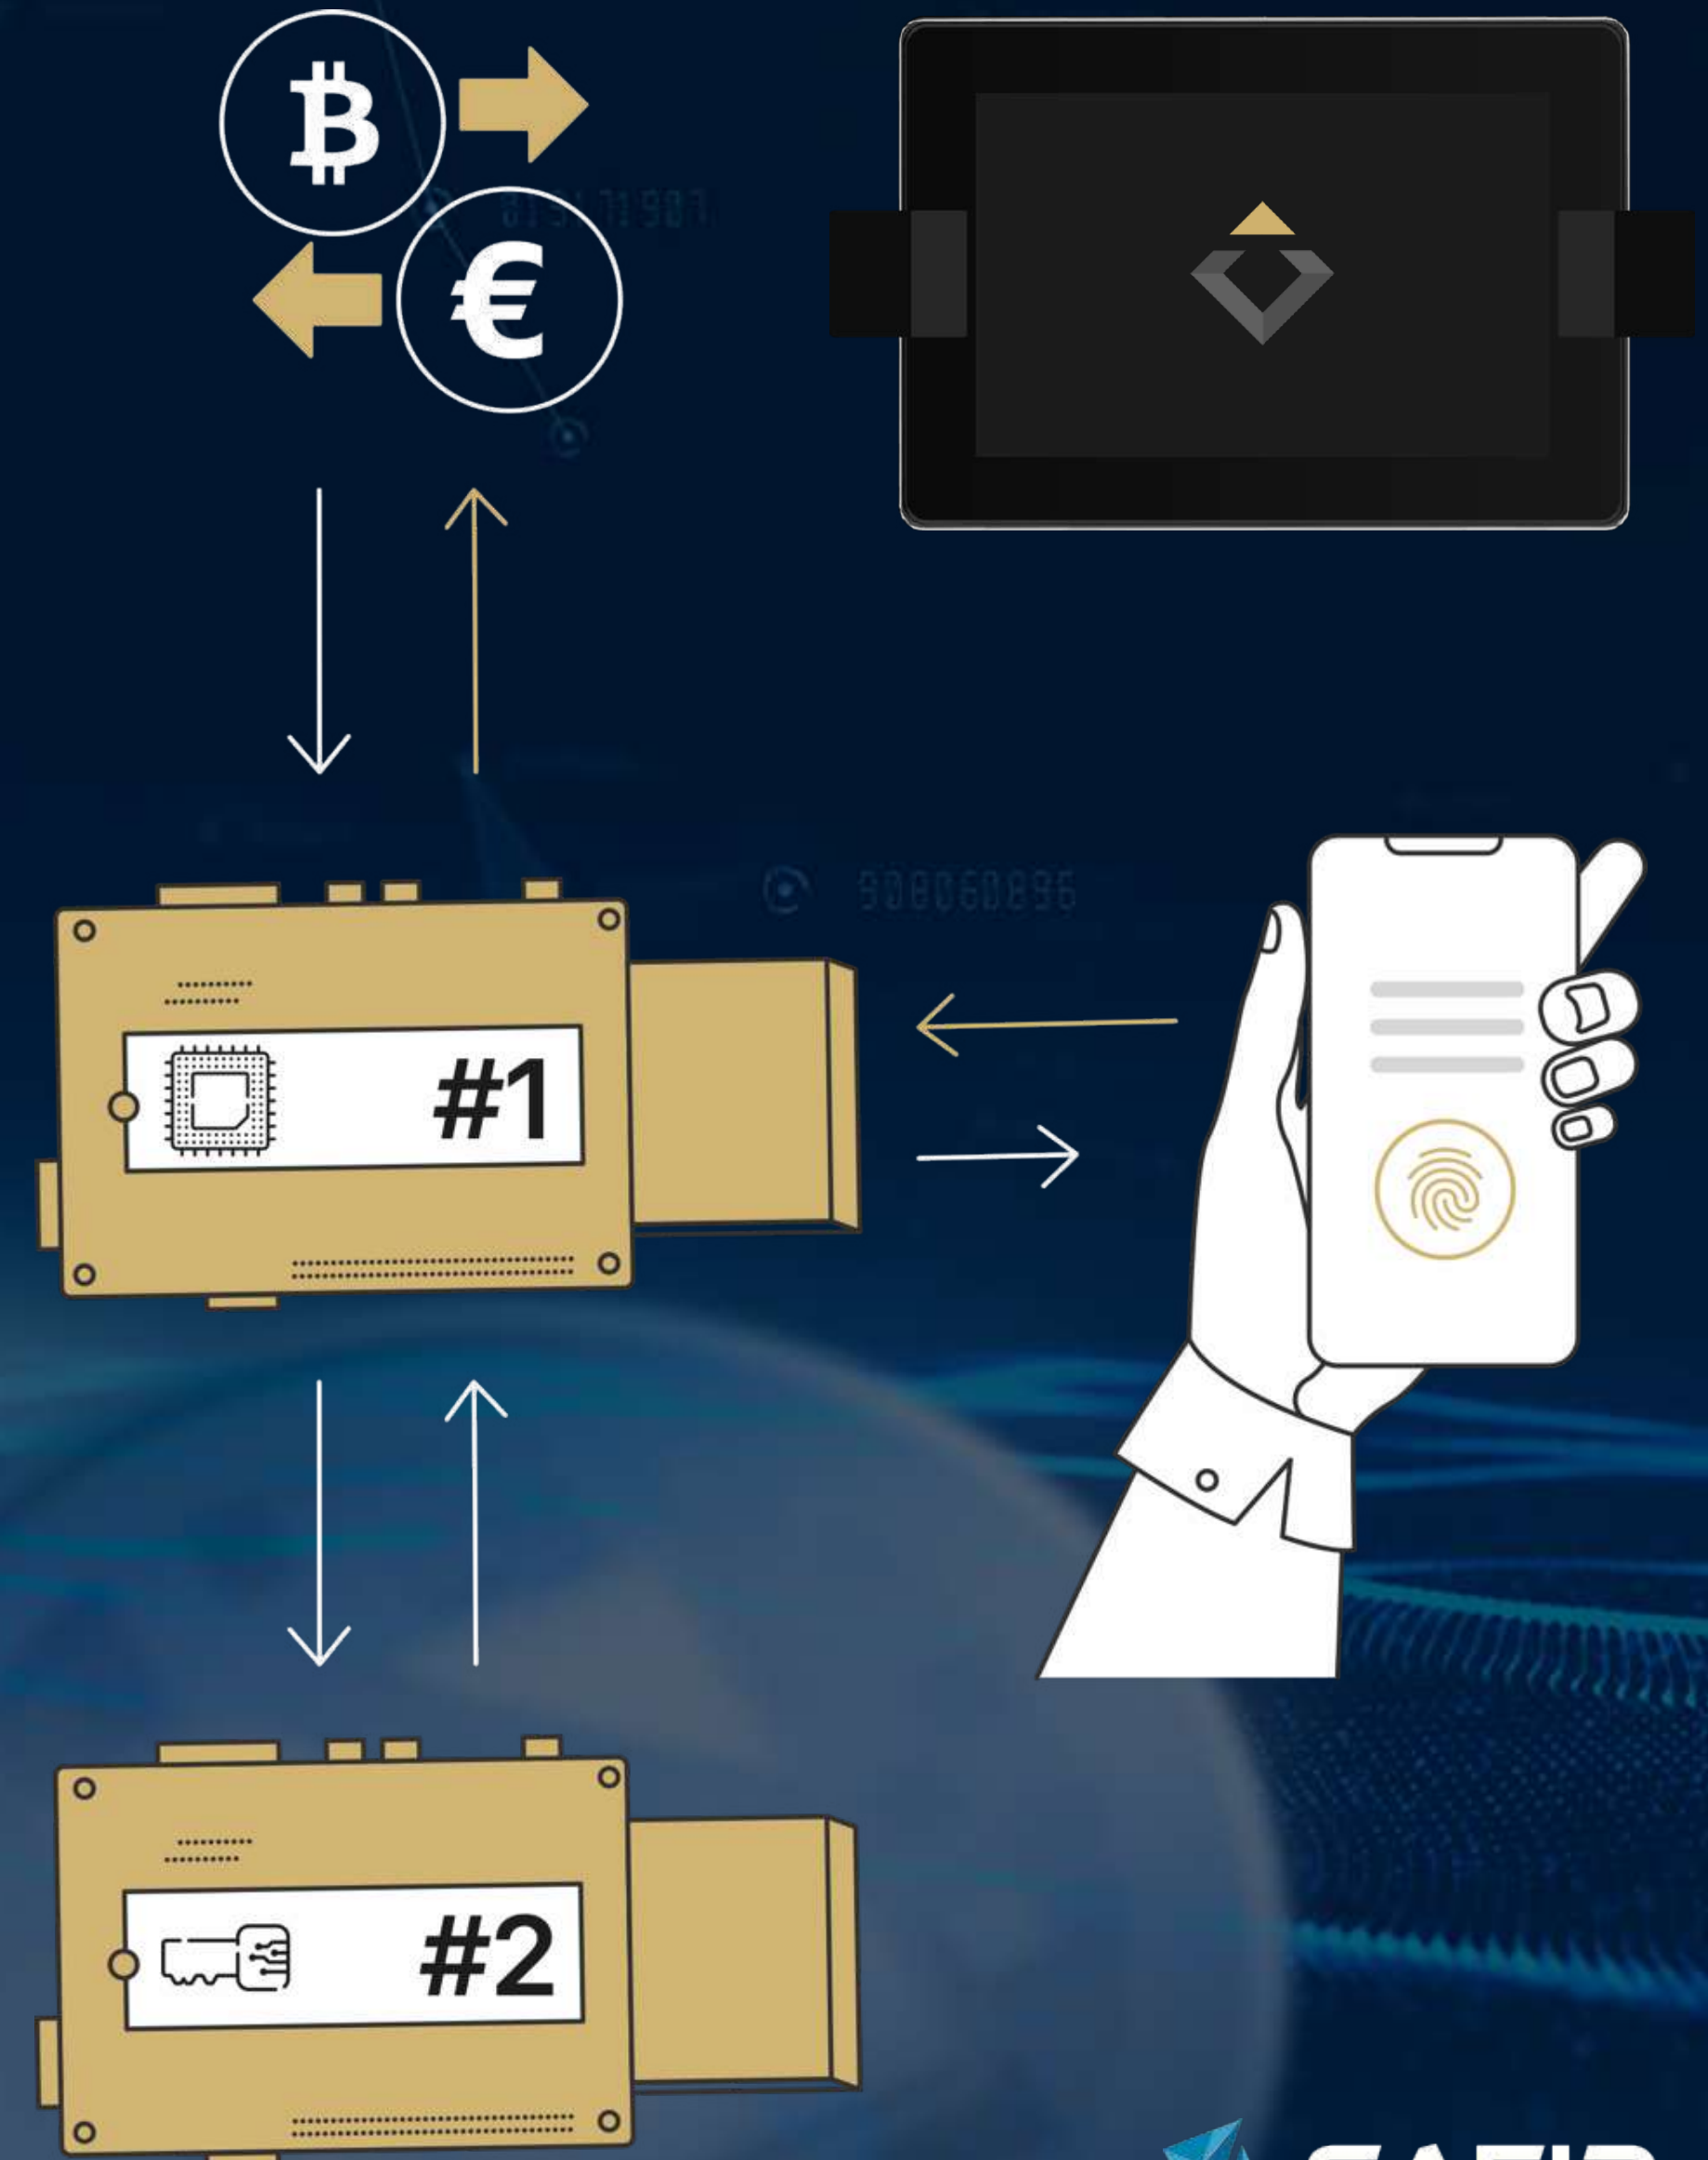

The ZENIQ HUB as "access key"

Maximum SAFETY for your DIGITAL ASSETS

UNIQUE insurmountable safety-features

- Decentralized network
- Regulation-free (hardware)
 - no BaFin, Finma or SEC license required
- Own hardware nodes protect the network - like Bitcoin
- No specific target for cybercrime
- No third-party authentication
- ZENIQ HUB generates a private key
 - only visible to the owner
- Buy/sell directly from the ZENIQ HUB

The Key Guard is a technical high-security safe that stores the most valuable possession, the private key, and never communicates externally. The ZENIQ Hub thus creates an unprecedented security standard for crypto assets with its additionally built-in security component.

ZENIQ App

- Decentralized Wallet
- Real-time fiat and crypto transactions
- Crypto and fiat payments for online and shop payments (at the “POS”)
- Private and secure
- Own wallet on the smartphone
- Smartphone paired with the ZENIQ HUB

Simple operation – suitable for the masses – intuitive to use

ZENIQ EXCHANGE

- Best exchange rates
- IBAN-compatible verification
- Very low fees - much cheaper than common exchanges
- Additional fee advantages by using ZENIQ Coin (own coin)
- Eurocoin (own decentralized stablecoin) with real-time transactions (instant transactions) 0.01 EUR as a fixed transaction fee
- All popular standard crypto trading currency pairs
- Asset exchanges of all kinds, from coins and tokens to countless other digital assets

Objective:

To be positioned among the top 10 exchanges in the world from the 3rd year on

Decentralized Crypto Exchanges / ZENIQ, A SYSTEM COIN

	
UNISWAP UNI PREIS USD 41.92	VERANDERUNG IN 24 STUNDEN + 7.03 %

ZENIQ COIN

Asset accumulation through real projects and use-cases

- Limited amount of coins
- The coins have huge potential for increase through
 - limited amount of HUB 01 with full minting power
 - annual halving
 - weekly „profit distribution“ from the ZENIQ Exchange for sustainable income
 - Tokenization of ZENIQ projects & others

Hybrid Blockchain:

- Additional masternodes possible
- ZENIQ coin can be used as platform for tokens

Listed on:

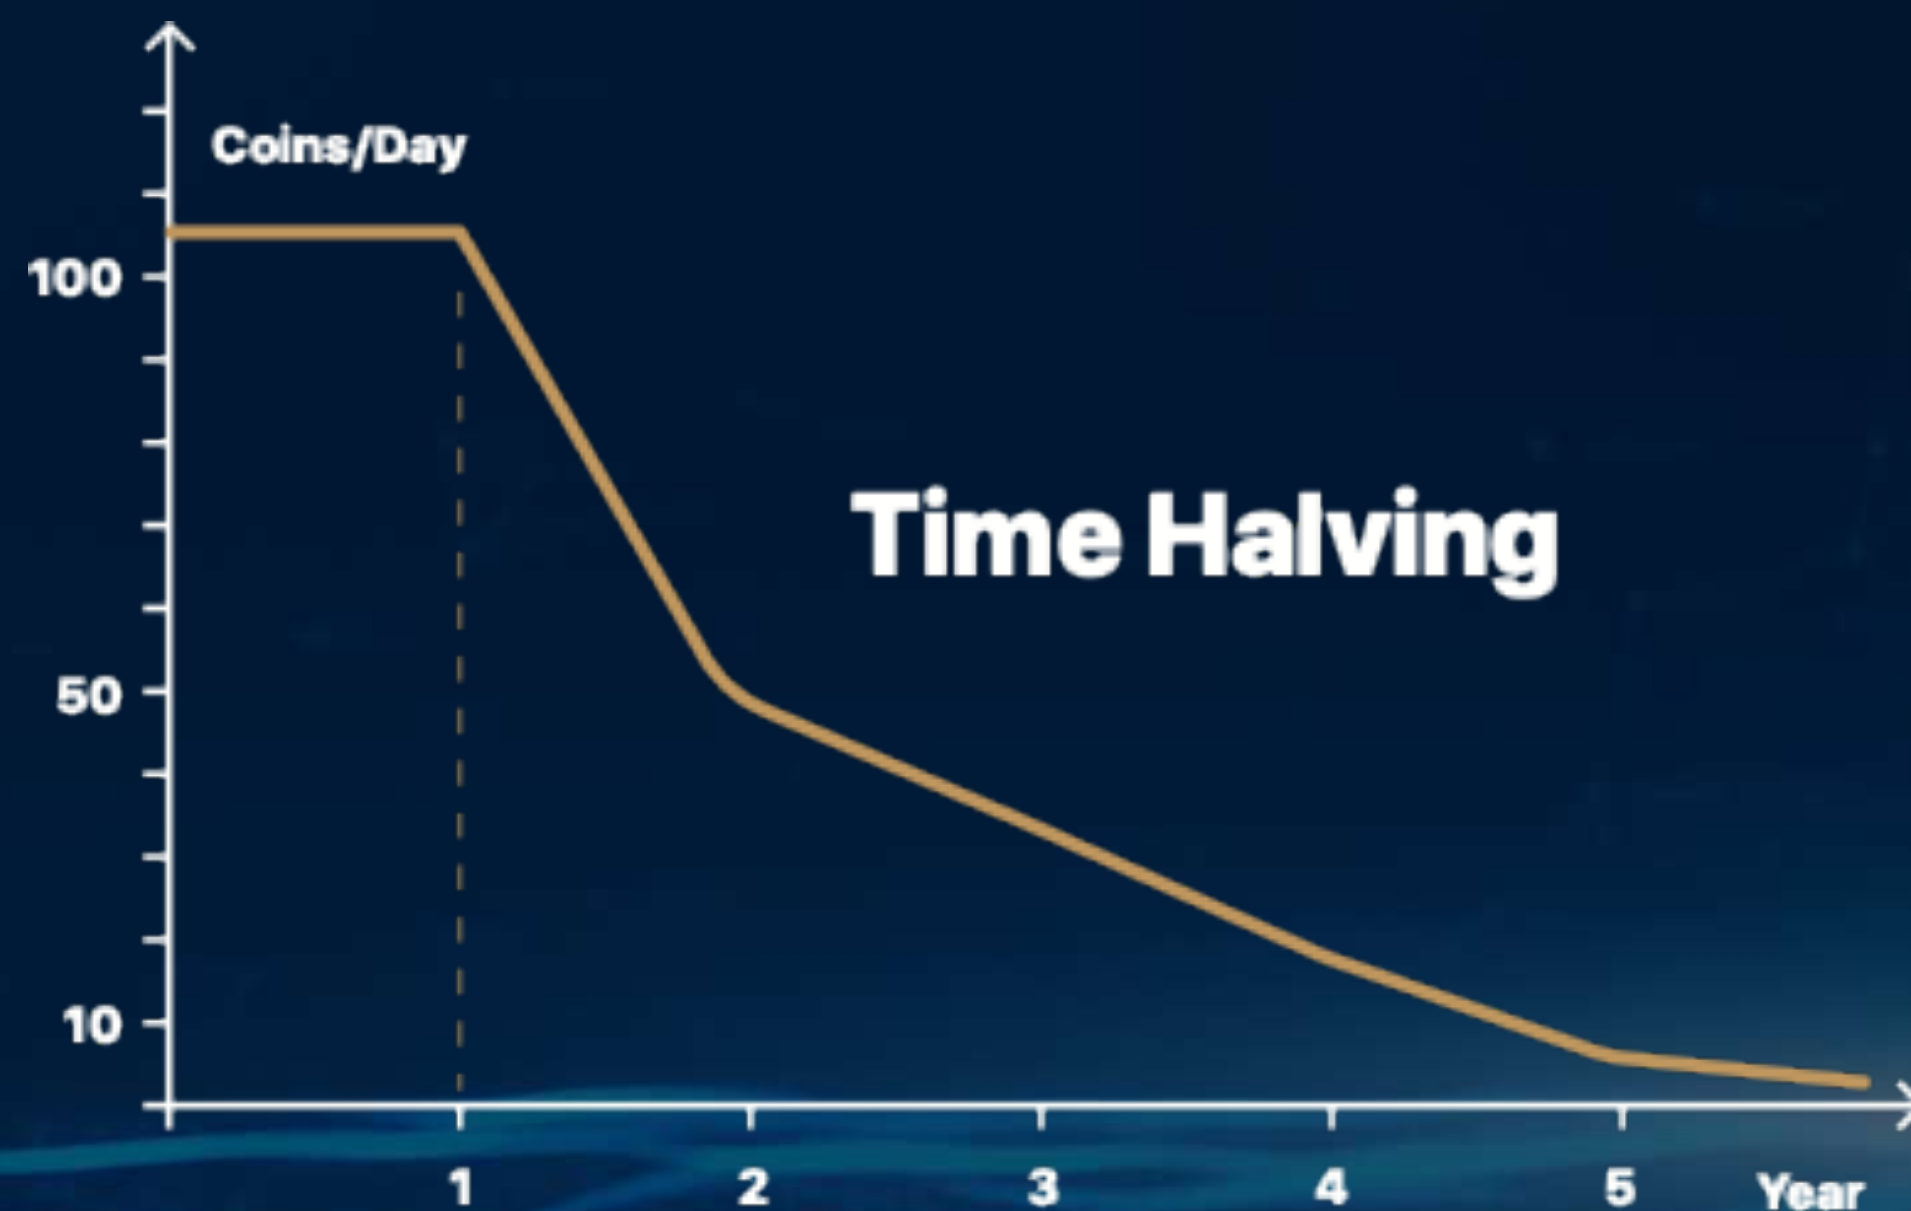

Next:

AND there are many more to come!

HALVING Overview

Depending on Blockchain period

Every year (from the 10th of february to the next 10th of february) 50% less minted coins/day

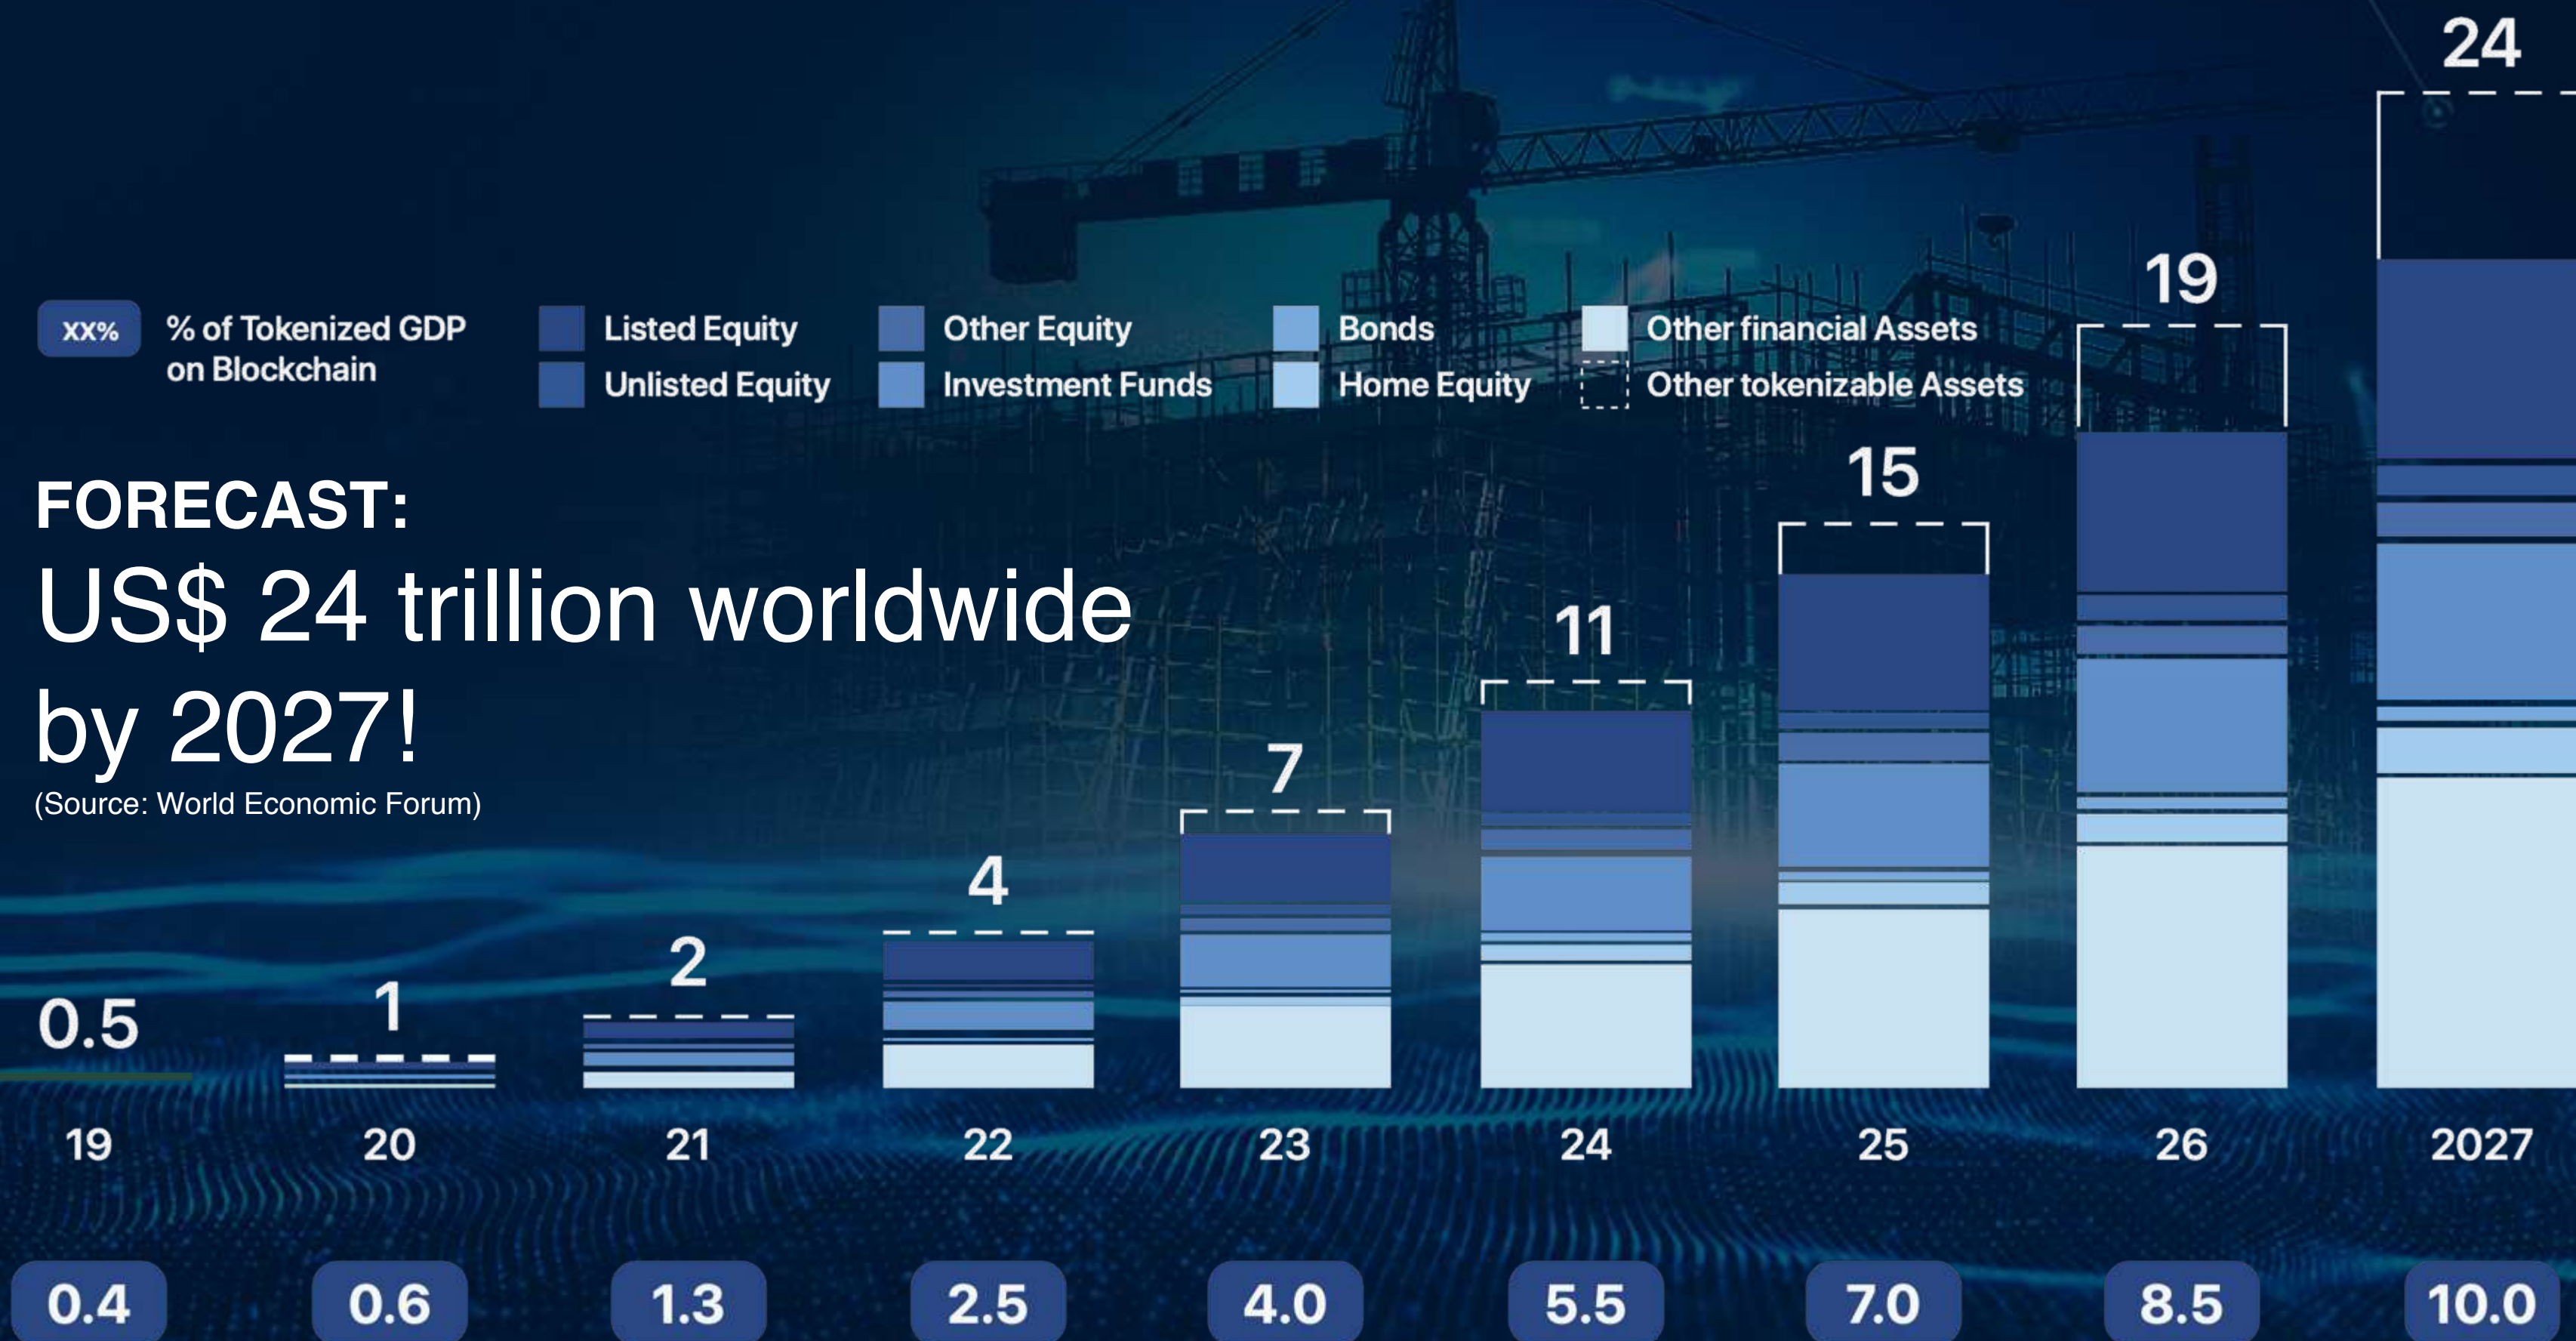

Depending on the HUB sale

Every 1,000 HUBs > 4% less coins/day

Multi Trillion Market

Largest market after derivatives with a market volume of USD 800 trillion

74 times bigger** than

OR 285 times bigger** than

– and this only in the timeframe of the next six years until 2027!

Source:
<https://de.statista.com/statistik/daten/studie/6003/umfrage/die-wertvollsten-marken-weltweit/>

Asset accumulation through real projects and use-cases

*Every ZENIQ tokenization project influences the value development of the ZENIQ coin.

**Calculation based on Brand equity in 2020

Multi Trillion Market: Tokenization!

Reasons for Tokenizations

- Project finance
- Huge savings potential for companies (multi-billion p.a. globally)
- 100% transparency and time savings through blockchain technology

What can be tokenized?

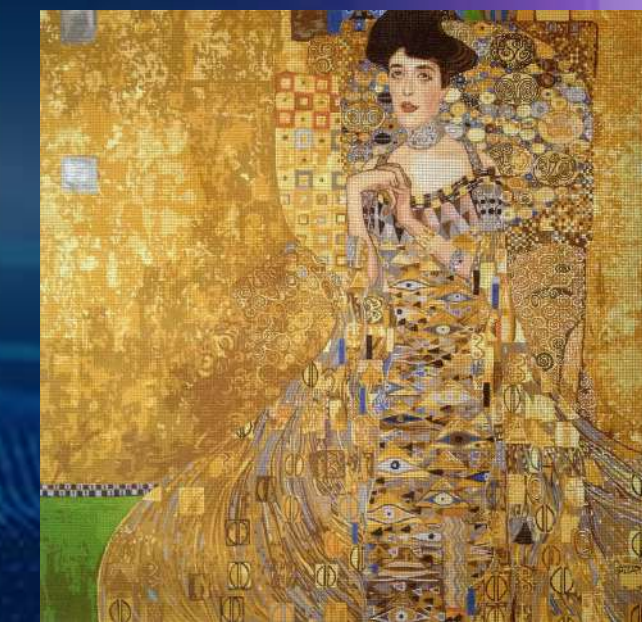

- Real estate
- Solar plants, wind power etc.
- Art, paintings, antiques
- Patents, licenses, contracts for work
- Assets of raw materials and finances

...

TOKENIZATION Market volume

FORECAST: US\$ 24 Trillion till 2027 worldwide!

SAFIR Benefit Plan

YOUR SUPPORT COMPANY / SAFIR GLOBAL DMCC

SAFIR has the exclusive distribution right for the distribution of products and software developments from ZENIQ for the area of recommendation marketing.

🚩 India*

🚩 Europe*

🚩 Russia*

🚩 S&N America*

SAFIR GLOBAL HQ:

Safir Global Headquarter · Jumeirah Lakes Towers
Fortune Tower · Office 2703 · Dubai

*Planned Offices

Network building – Earning through activity

THREE (3) kinds of "benefits" for your success!

1. Uni-level (up to 15 levels)
2. Career Bonus
3. Bonus Pool

 **Maximum
Payout: 69%**

Use your opportunities!

Network building – Earning through activity

1. Uni-level / up to 15 levels

*Dynamic compression

New accounts or accounts that are not activated are not considered the first level and are automatically skipped during remuneration.

As a result, there is no level disadvantage.

All accounts are entitled to compensation from direct recommended buyers = first (1) level.

Note: In case of multiple registrations, the last registered ID numbers / accounts will be deleted. Benefits obtained through multiple registrations will be forfeited.

Uni-level unlimited,
1,000 first lines or more possible

2. Career levels (Bonus payments)

32

Network building – Earning through activity

3. Bonus Pool / Performance Bonus

Value is divided between the SharePoints achieved in the respective production month (monthly payment).

Note: Minimum sales (40% clause, that means: Every „leg“ will be limited to not exceed 40% of the total sales, within the own network, in the calculation. This is shown as "Performance" in your SAFIR online back office.) of the respective level for receipt in the pool must be confirmed every 6 months. If the minimum sales is not achieved, the user falls into the lower level or the level that corresponds to the sales of the last 6 months, and his SharePoints for the pool are adjusted to the Career-level reached.

*World bonus payment by performance bonus (sales of physical HUBs or HOUSING HUBs / In-house Minting).

**Number of SharePoints per career level
